

## 5-year product warranty for Solar Light

On products purchased after 1 May 2017 Solar Light provides a 5-year warranty against manufacturing defects and material defects on products in the Solar Light product range \*. Provided that the conditions of the warranty are met, Solar Light or its suppliers will either repair or replace the products.

### THE WARRANTY COVERS UNDER THE FOLLOWING TERMS:

- The product has been used and installed correctly in accordance with technical specifications, installation manual and maintenance manual as well as applicable legislation.
- The warranty covers from Solar's invoicing date.
- The warranty period is based on a burning time of max. 4000 hours per year. In the case of more than 4000 hours of burning time per year, the warranty period is adjusted pro-rata.

### THE WARRANTY DOES NOT COVER:

- Costs for troubleshooting, disassembly or reassembly of the products.
- Operating losses of any kind.
- Faults and defects caused by extreme conditions e.g. lightning, water intrusion, fire, lack of ventilation or exceeded operating temperature.
- Faults and defects caused by improper use, including mechanical and electrical influences.
- General maintenance and repair, as well as replacement of wearing parts such as replaceable light sources, starters and accumulators.
- Defects and errors caused by compatibility problems between products and the installation e.g. power supply and control system.
- If the product has been modified without the written approval of Solar Light.
- Luminous flux decline that is within the value specified for the product (For example, L80).

In addition, please refer to Solar's sales, delivery and return terms.

\* Solar Light products are products that are concept-marked at the time of purchase with Solar Light on Solar's web shop or available at [solarlight.nl](http://solarlight.nl). Special variants of Solar Light product series are also covered by this 5-year product warranty.
